# Moisture Checker **MY-707S**

**Handy yet sophisticated**  
Hand-held device featuring ease of use

**Beautiful skin hinges upon its moisture.  
This moisture checker helps  
check skin moisture.**

- ◆ High measuring performance
- ◆ Ultra-compact, lightweight, hand-held size
- ◆ Easy-to-view display
- ◆ Long-life, energy-saving type
- ◆ Excellent durability thanks to the latest electronics
- ◆ Completely automatic follow-up type, allowing the user to constantly get accurate measurements

# Moisture Checker MY-707S

## The moisture checker monitors your skin to give you a good grasp of the current state of your skin.

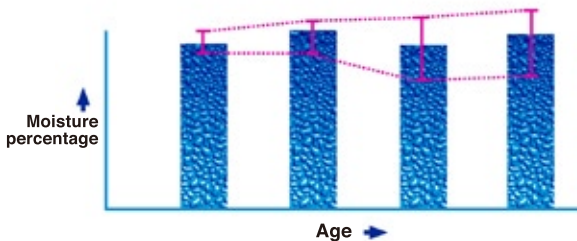

Beautiful skin full of moisture depends on the moisture percentage. Simply hold the moisture checker lightly against your skin to determine the moisture percentage.

Unlike conventional moisture measuring systems, no complicated operations are required. Anybody can measure the moisture percentage of his/her skin in an instant anytime, anywhere. Please use this device in choosing regular skin care products or cosmetics.

- High measuring performance
- Ultra-compact, lightweight, hand-held size
- Easy-to-view display
- Long-life, energy-saving type
- Excellent durability thanks to the latest electronics
- Completely automatic follow-up type, allowing the user to constantly get accurate measurements

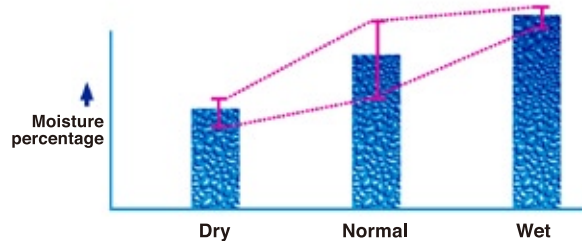

### The youthfulness of your skin depends on your skin care.

For parts of the skin, where sebum secretion is scarce, such as the outer corner of the eye, there is little difference in the average skin moisture with age. As you age, however, individual differences grow, which are believed to be attributed to the difference in skin care you have applied from your early years.

### There is an appropriate level of skin moisture.

Meanwhile, for the forehead, where sebum secretion is high, there are large differences in the average skin moisture depending upon the skin type. Skin moisture should be neither high nor low because either can cause skin trouble. It is best to get an accurate grasp of your skin moisture level and to take care of your skin so that you can maintain an appropriate level of skin moisture all the time.

### Moisture Checker MY-707S

The specifications and others may change without prior notice for quality improvement. The color of the product may differ from the one on the brochure due to printing quality.

Power source : AAA dry cell battery × 2  
Operating time : Continuous 167 hours or longer  
(when AAA alkaline dry cell batteries are used)  
Effective measuring range : 16~68%  
Operating temperature range : 5°C~35°C  
Gross weight : Approx. 85 g
